

Dubai World Trade Centre Augmented Reality

Digital Communication LLC (DigiComm) and INDE showcase the region's first Augmented Reality experience at GTX Dubai.

INDE develops award-winning interactive and immersive products and experiences in advertising, entertainment and education. On the other hand, DigiComm develops using emerging technologies such as augmented reality, virtual reality, motion capture, computer vision and robotics to create next generation platforms that change the way people interact with content.

DigiComm is always working hard to keep up with the trend, and even make a new trend that places our projects in 'world's firsts'.
